

# HIGH-PERFORMANCE FAN HEATER

DCR 030 | DC 24 V, DC 56 V – 200 W to 800 W

- > High DC heating performance
- > Integrated thermostat or hygrostat (optional)
- > Small hysteresis
- > Integrated switch module
- > Screw fixing
- > Optical indicator (LED)

The compact high performance fan heater prevents formation of condensation and frost and provides an evenly distributed interior air temperature in enclosures with electric/electronic components. The fan heater is available with an integrated electronic thermostat or integrated electronic hygrostat. The model with thermostat is available with internal or external sensor. The fan heater with integrated hygrostat is equipped with an external sensor. The external sensor can be positioned freely anywhere in the enclosure for precise measurements of temperature and humidity. The DCR 030 was designed as a stationary unit for the bottom of the enclosure. For wall fixing the fan heater DCR 130 is recommended.
